

Tier 1 Critical Care List

Medications

Acetadote (N-Acetylsteine)	Insulin
Adenosine	Isoproterenol
Amiodarone	Ketamine
Angiomax (Bivaliruden)	Ketorolac (Toradol)
Antibiotics	Lasix (Furosemide)
Asprin	Lebatolol
Atenolol	Levalbuterol (Xopenex)
Atropine	Levophed (Norepinephrine)
Beta Blocking Agents	Lidocaine
Blood and Blood Products	Lorazepam (Ativan)
Calcium Chloride (Calcium Preparaions)	Magnesium Sulfate
Calcium Gluconate	Mannitol
Cardene	Metoprolol
Cardizem (Diltiazem)	Methylprednisolone
Crystalloid and Colloid Solutions (all)	Midazolam (Versed)
Decadron (Corticosteroids)	Morphine
Dexamethasone Sodium Phosphate	MVI (Banana Bag)
Dextrose, 50%	Narcan (Naloxone)
Dextrose, 10%	Nicardipine (Cardene)
Diazepam	Nidedipine
Dilaudid (Hydromorphone)	Nitroglycerine Infusion
Diltiazem	Octreotide
Diphenhydramine	Ondanestron
Dobutamine	Oral Glucose
Dopamine	Oxytocin (Pitocin)
DuoNeb	Pralidoxime (2PAM)
Epinephrine 1:10,000	PCA (Patient-Controlled Anesthesia)
Epnephrine 1:1,000	Phenobarbital
Fentanyl (Sublimaze)	Potassium Infusion
Fosphenytoin (Phenyton)	Propofol (Diprován)
Glucagon	Propanolol
Glycoprotein Inhibitors (Aggrastat, Integrillin)	Protonix (Proton Pump Inhibitors)
H2 Blockers (Pepcid)	Racemic Epinephrine
Heparin	Sodium Bicarbonate
Hypertonic Saline, 3.3%	Sodium Nitroprusside
Hydralazine	TPA (Tissue Plasminogen Activator)
Hydrocortisone Sodium Succinate	TPN (Total Parenteral Nutrition)
Hydroxizine	Tranexamic Acid

Equipment

Infusion Pump	Mechanical Ventilator on Bi-Level (BiPAP) Mode*
Closed Chest Drainage System	PCA Infusion Pump

*If the patient to be transferred is on a ventilator, there must be a Respiratory Therapist accompanying the patient to monitor the ventilator
